FOR IMMEDIATE RELEASE

MULTISTACK ACQUIRES BUDZAR INDUSTRIES TO
EXPAND ENERGY EFFICIENT OFFERINGS

SPARTA, WI – Multistack, LLC, a privately held manufacturer of innovative cooling, heating and energy recovery systems has acquired Budzar Industries. Budzar Industries of Willoughby, OH is a manufacturer of custom temperature control and pumping systems for the rubber, chemical, pharmaceutical, and food industries. Multistack will operate Budzar as a wholly owned subsidiary. The companies will maintain their separate headquarters, engineering and manufacturing facilities; Executive teams of the two companies will remain intact.

Charles Kenyon, CEO of Multistack said, “We are thrilled to have Budzar join us as we continue with our long-term plan of growth. Budzar, like Desert Aire (acquired Jan. 2017) and Standard Refrigeration (acquired Oct. 2017), fits well within that growth plan. All of our companies have industry-leading reputations as well as cultures that emphasize innovation, quality, and customer support.”

Multistack employs over 170 people at its 245,000 sq. ft. Sparta, Wisconsin facilities, where the company manufactures leading-edge cooling and heating solutions under the brand names of Multistack®, Airstack™, MultiPRO™ and MagLev®. For more information contact Rachel Hundt, Marketing Coordinator at rhundt@multistack.com or 608-366-2400.
