

PORTABLE SILVER SERIES HOT OIL

FOR OPERATING TEMPERATURE UP TO 600°F

Budzar Industries has over 30 years of experience engineering and building hot oil systems. Budzar engineers are experts at ensuring hot oil systems are accurate, leak-free and safe.

The Silver Series with its maximum operating temperature of 600°F shares the same engineering principles as Budzar's high temperature oil systems. With simple and easy to understand controls and a premium on operator safety, the Silver Series will stand the test of time.

engineering **PRECISION**

- Welded pipe construction eliminates leaks
- Compact, space saving design
- Carbon steel powder coated sheet metal cabinet with lift off panel for maintenance access—no sheet metal screws to remove
- Ultra low heater watt density prevents “coking” and extends useful life of oil
- Y-strainer on pump suction line
- Internal by-pass valve maintains proper flow across the heater regardless of the pressure drop through your process
- Automatic air and water vapor purging system simplifies start-up and prevents pump cavitation
- Heater case design eliminates air pockets that can damage the heater element
- Heater center core baffles increase oil velocity and prevent damage to the oil
- Positive displacement pump with TEFC motor
- High temperature mechanical pump seal prevents leaks
- Reversible pump/evacuation
- Low pressure safety switch for protection against running without proper fill
- Non-proprietary PID microprocessor controller operator's digital display
- Motor starter with solid state overload protection
- Non-fused lockable rotary disconnect
- Separate process and set point temperature displays
- Full lighted status display provides complete diagnostics for the system
- High level alarm
- Audible alarm

OPTIONS

- UL Listed panel
- Electrically actuated automatic cooling control without system temperature spikes or cooling water flashing
- Integral 5 ft² Stainless steel cooling bundle provides smooth cooling profiles without flashing at high operating temperatures

Standard Options

- Side Stream Cooling, Water Cooling 5 sq. ft
- Main Stream Cooling, Water Cooling 5 sq. ft
- Solid State Relays
- Isolation Valves
- RS-485 Digital Communications
- Upgrade to 600°F Maximum Temperature
- Dual Zone
- Hose Kit
- Retransmission/Remote Set Point
- Hoffman NEMA 12 enclosure
