For Immediate Release

Willoughby, OH – May – 2014 - [Budzar Industries, Inc.](http://www.budzar.com), a leader in process fluid heat & cold transfer systems that measure and control the temperature of primary processing equipment, announces the recent acquisition of [BV Thermal Systems](http://www.bvthermal.com), LLC of Modesto, California.

BV Thermal Systems, designs and manufactures refrigeration-based, temperature-controlled liquid recirculation systems and water-cooled heat exchanger systems. BV Thermal Systems serves semiconductor fab plants, scientific instrumentation labs, medical (lasers, blood analyzers, MRI systems, CT scanners), bio-med, pharmaceutical, EDM and other high tech companies in North America and abroad.

BV Thermal Systems, which previously operated as Bay Voltex, is now the designer and manufacturer of the well known Bay Voltex Chillers which were introduced in 1980 and are found primarily in the laboratory, semiconductor and medical industries.

“The BV Thermal Systems’ team brings decades of experience and a passion for surpassing the expectations of its customers. Like Budzar Industries, BV is all about being a trusted, on time supplier of high quality heaters and chillers at a competitive price,” states David Young, president of Budzar Industries. “And, by bringing BV under the Budzar Industries umbrella, we plan to leverage our collective purchasing, engineering and manufacturing capabilities to provide customers with reliable, innovative products and responsive service at a lower price.”

Dave Pease, former owner of BV Thermal Systems, will be working with Budzar for 6 - 12 months to assist in the transition. All other BV personnel will remain with the company at its Modesto, CA, facility. “We plan to invest for growth by adding capacity, capabilities and motivated, team-oriented associates to various functional areas as required,” continued Mr. Young.

“Budzar Industries is the perfect fit for us. They have a great understanding of our business and will definitely fuel our growth,” says Richard Broadbent, Operations & Engineering Manager at BV Thermal Systems. “They want to provide us with the resources and support we need to enhance relationships with existing customers as well as develop new ones.”

Since 1975, Budzar Industries has earned a reputation for quality and ingenuity in the custom design, engineering, and manufacturing of temperature control systems for a wide range of capital equipment. Today, Budzar Industries products can be found throughout the world bringing accurate temperature measurement and control to the production of pharmaceuticals, chemicals, petroleum, plastics, rubber, paper, power, steel, food processing and more.
