## **Budzar Industries, Inc. Announces ISO 9001 Certification**

**Willoughby, Ohio** –Budzar Industries, Inc. is proud to announce it is now certified as an ISO 9001:2008 compliant organization.

To become certified as ISO 9001:2008 compliant, Budzar Industries, Inc. underwent an evaluation process that included quality manufacturing system development, a manufacturing system documentation review, pre-audit, initial assessment, and clearance of non-conformances, all of which work to identify corrective actions that eliminate non-conformance to the manufacturing quality standard. The process ended in a comprehensive two-day registration audit by SRI, an accredited registrar headquartered in Pittsburgh, PA. After correction and closure of all non conformances, Budzar Industries, Inc. received its ISO 9001:2008 certificate of registration on February 17, 2009.

“We believe that our decision to become ISO 9001 Certified is one that anticipates the needs and demands of our customers and also demonstrates our commitment to providing quality engineering, machinery and services to all of our customers” said David F. Young, President of Budzar Industries, Inc. “Our entire company is committed to manufacturing top quality machinery. With our ISO certification and annual surveillance, our customers can be confident that Budzar Industries, Inc. is dedicated to providing and maintaining the highest quality customer satisfaction in all phases of our manufacturing process.”

The scope statement for certification states that the “Design, manufacture and field service of re-circulating fluid process temperature control equipment for industries and processes where accurate temperature control is critical to the primary manufacturing process”.

Budzar Industries specializes in process fluid heat transfer systems. Since 1975, Budzar Industries has earned a reputation for quality and ingenuity in the design, engineering, manufacturing and field services of temperature control systems. Today, Budzar Industries, Inc. systems can be found throughout the world bringing accurate temperature measurement and control to the production of: pharmaceuticals, chemicals, petroleum, plastics, rubber, paper, power, steel, and food.
